**SIDDHARTH INSTITUTE OF ENGINEERING & TECHNOLOGY:: PUTTUR**  
(AUTONOMOUS)

**B.Tech III Year I Semester Supplementary Examinations Feb-2021**

**STRUCTURAL ANALYSIS-I**

**(Civil Engineering)**

Time: 3 hours

Max. Marks: 60

(Answer all Five Units 5 x 12 = 60 Marks)

**UNIT-I**

- 1 Find horizontal and vertical deflection of joint C of truss ABCD loaded as shown in 12M figure below. Assume that, all members have the same axial rigidity.

OR

- 2 Three wires AO, BO and CO support a load 40 kN as shown in figure. Assume that the 12M cross sectional area of all members are same. Determine the forces in all the wires.

**UNIT-II**

- 3 a What are the advantages of fixed beams over simply supported beams? 4M  
b A fixed beam of length 6 m carries two point loads of 30 kN each at a distance of 8M 2m from both ends. Determine the fixed end moments and draw BMD.

OR

- 4 A continuous beam ABC of uniform section with span AB and BC as 4 m each, is 12M fixed at A and simply supported at B and C. The beam is carrying a uniformly distributed load of 6 kN/m run throughout its length. Find the support moments and the reactions using theorem of three moments. Also draw SFD and BMD.

**UNIT-III**

- 5 a Explain in brief about (i) Degree of static indeterminacy and (ii) Degree of kinematic indeterminacy with one example each. **4M**
- b Analyze the continuous beam shown in figure below, using slope deflection method. Draw bending moment diagram for the continuous beam. **8M**

**OR**

- 6 Analyze the frame shown in figure by slope deflection method. Draw BMD. Assume flexural rigidity is same for all members. **12M**

**UNIT-IV**

- 7 Analyze the continuous beam as shown in figure below by moment distribution method. Draw the bending moment diagram. **12M**

**OR**

- 8 Analyze the portal frame shown in figure using moment distribution method. **12M**

## UNIT-V

- 9 Analyze the continuous beam shown in the figure by Kani's method. Draw the 12M bending moment diagram.

OR

- 10 Analyze the frame shown in figure using Kani's method. Draw the bending moment 12M diagram.
