SIDDHARTH INSTITUTE OF ENGINEERING & TECHNOLOGY:: PUTTUR (AUTONOMOUS) M.Tech I Year II Semester Regular Examinations October-2020 SOFT COMPUTING (Computer Science & Engineering) Time: 3 hours Max. Marks: 60 (Answer all Five Units 5 x 12 = 60 Marks) UNIT-1 1 a Describe the applications of ANN. b Write short note on the characteristics of ANN. b What are the types of neuron activations functions? b What are the learning strategies for artificial neural networks? UNIT-II 3 a Write short notes on the back propagation network. b Briefly discuss about back propagation network. b Briefly discuss about back propagation network. c UNIT-III 5 a Discuss about the operations of fuzzy sets. b Describe about the fuzzy relations. CR 6 a What are the properties, operations of classical sets? b Explain the relations of classical sets.	
AUTONOMOUS) M.Tech I Year II Semester Regular Examinations October-2020 SOFT COMPUTING (Computer Science & Engineering) Time: 3 hours Max. Marks: 60 (Answer all Five Units 5 x 12 = 60 Marks) UNIT-1 1 a Describe the applications of ANN. b Write short note on the characteristics of ANN. b Write short note on the characteristics of ANN. CR 2 a What are the types of neuron activations functions? b What are the types of neuron activations functions? b What are the learning strategies for artificial neural networks? UNIT-II 3 a Write short notes on the back propagation network. b Briefly discuss about back propagation learning. In details OR 4 Discuss about the hetero associative memory network. b Describe about the operations of fuzzy sets. b Describe about the fuzzy relations. OR 6 a What are the properties, operations of classical sets? b Explain the relations of classical sets.	
M.Tech I Year II Semester Regular Examinations October-2020 SOFT COMPUTING (Computer Science & Engineering) Time: 3 hours Max. Marks: 60 (Answer all Five Units 5 x 12 = 60 Marks) UNIT-1 1 a Describe the applications of ANN. b Write short note on the characteristics of ANN. b Write short note on the characteristics of ANN. cR 2 a What are the types of neuron activations functions? b What are the types of neuron activations functions? b What are the learning strategies for artificial neural networks? UNIT-11 3 a Write short notes on the back propagation network. b Briefly discuss about back propagation learning. In details OR 4 Discuss about the hetero associative memory network. UNIT-11 5 a Discuss about the operations of fuzzy sets. b Describe about the fuzzy relations. OR 6 a What are the properties, operations of classical sets? b Explain the relations of classical sets.	
(Computer Science & Engineering)         Time: 3 hours       Max. UNIT-1         3 a Write short notes on the back propagation network.         b Briefly discuss about back propagation learning. In details         OR         4 Discuss about the hetero associative memory network.         UNIT-III         5 a Discuss about the operations of fuzzy sets.         b Describe about the fuzzy relations.         OR         6 a What are the properties, operations of classical sets?         b Explain the relations of classical sets.	
Time: 3 hours Max. Marks: 60 (Answer all Five Units <b>5 x 12 = 60</b> Marks) UNIT-1 <b>1 a</b> Describe the applications of ANN. <b>b</b> Write short note on the characteristics of ANN. <b>0</b> R <b>2 a</b> What are the types of neuron activations functions? <b>b</b> What are the learning strategies for artificial neural networks? UNIT-II <b>3 a</b> Write short notes on the back propagation network. <b>b</b> Briefly discuss about back propagation learning. In details <b>0</b> R <b>4</b> Discuss about the hetero associative memory network. <b>UNIT-III</b> <b>5 a</b> Discuss about the operations of fuzzy sets. <b>b</b> Describe about the fuzzy relations. <b>0</b> R <b>6 a</b> What are the properties, operations of classical sets? <b>b</b> Explain the relations of classical sets.	
UNIT-I a Describe the applications of ANN. b Write short note on the characteristics of ANN. OR a What are the types of neuron activations functions? b What are the learning strategies for artificial neural networks? UNIT-II 3 a Write short notes on the back propagation network. b Briefly discuss about back propagation learning. In details OR 4 Discuss about the hetero associative memory network. b Describe about the operations of fuzzy sets. b Describe about the fuzzy relations. OR 6 a What are the properties, operations of classical sets? b Explain the relations of classical sets.	
I a Describe the applications of ANN. b Write short note on the characteristics of ANN. CR a What are the types of neuron activations functions? b What are the types of neuron activations functions? b What are the learning strategies for artificial neural networks? UNIT-II a Write short notes on the back propagation network. b Briefly discuss about back propagation learning. In details OR 4 Discuss about the hetero associative memory network. UNIT-III 5 a Discuss about the operations of fuzzy sets. b Describe about the fuzzy relations. OR 6 a What are the properties, operations of classical sets? b Explain the relations of classical sets.

<ul> <li>OR</li> <li>6 a What are the properties, operations of classical sets?</li> <li>b Explain the relations of classical sets.</li> </ul>	6M
<ul> <li>6 a What are the properties, operations of classical sets?</li> <li>b Explain the relations of classical sets.</li> </ul>	
<b>b</b> Explain the relations of classical sets.	6M
UNIT-IV	6M
7 Explain about the development of rule base and decision making system.	12M
OR	
8 Explain applications of fuzzy logic in control system with one example.	12M
UNIT-V	
<b>9</b> a Differentiate genetic algorithm verses traditional algorithm.	6M
<b>b</b> Describe the applications of genetic algorithm.	6M
OR	
10 Discuss in detail about various operators of GA and also explain GA evaluation procedure.	12M

**R19**
