6. About Programme : World Environment Day (WED) occurs on 5 June every year, and is the United Nation's principal vehicle for encouraging worldwide awareness and action for the protection of our environment. First held in 1973, it has been a flagship campaign for raising awareness on emerging environmental issues from marine pollution, human overpopulation, and global warming, to sustainable consumption and wildlife crime. WED has grown to become a global platform for public outreach, with participation from over 143 countries annually. Each year, WED has a new theme that major corporations, NGOs, communities, governments and celebrities worldwide adopt to advocate environmental causes

In a short span of time we collected a lot of materials and were able to hand it over to distribution centres. Such as pedestrians, motorists, cyclists, passengers, etc.

Everyone needs to be well aware of the road traffic rules especially children and young people who are at significant road accident risks. According to the statistics (World Health Organization, 2008), it is found that most of the hospitalization cases and leading cause of death are because of the road trauma.

First held in 1973, it has been a flagship campaign for raising awareness on emerging environmental issues from marine pollution, human overpopulation, and global warming, to sustainable consumption and wildlife crime. WED has grown to become a global platform for public outreach, with participation from over 143 countries annually. Each year, WED has a new theme that major corporations, NGOs, communities, governments and celebrities worldwide adopt to advocate environmental causes.
